MyPMS System Overview

Welcome to BookingCenter Online MyPMS Property Management System. BookingCenter PMS products the simplest, easiest-to-use Software for managing ALL aspects of your property and is a powerful tool to grow and expand your business. Set up, training and 24/7 Support included Ugrade your PMS and we will migrate your data and apply the set up fee of your original purchase to the new setup fee.

- Manage your entire business - bookings, guests, rooms, rate and finances
- Control pricing and availability with allocation to specific channels
- Run reports using our full range of automated reporting and marketing tools
- Market to your guests via email, print and fax
- Customize your system with Add-on Modules that fit your property
- Seamless integration between your CRS, Website, GDS and OTA channels.
- Connect to OTA programs with Trip Advisor and Booking.com, Expedia and Orbitz.

MyPMS is a service to manage any form of lodging establishment. Unlike conventional property management systems, MyPMS is a service rather than software that is loaded onto the properties computers. MyPMS is simply a website that users can log onto. It is intended for employees and owners of the property and is useful even at slower, dial-up connection speeds. Browsers currently supported are IE 7.0 or higher, Firefox 3.0 or higher and Safari 4.0 or higher.
The software accomplishes the following tasks:

- Inventory control,
- Reservations,
- Guest History,
- Housekeeping,
- Guest Accounting (folios),
- House Accounting (reports),
- City Ledger
- Content and security control,
- Integrated Credit Card Processing,
- Yield (LOS rules) and Tier (hurdle rates),
  Full distribution through the Global Booking Network including a choice of GDS & Internet distribution providers, the integrated booking engine and other web booking portal

Add-on Modules

Extend the power of your system with with Add-on Modules to grow your business.

- MyCard PCI Compliant Payment Gateway
- Point of Sale
- Call Accounting
- Guest Services Interface
- Yield Management
- Owner Management Module
- Marketing Services
- Trip Advisor

Setup and Training

We include a service for customers where we actually setup the entire property to assure BookingCenter is ready to go. Our employees customize the Software to your property. The reality is, setup is 95% of the hardships learning a new system. Learning is MUCH easier once the system is configured for your operation.

The 'Setup' service is especially helpful for new users of management systems and those who don't wish to use their time configuring software. It's simple, we have a few forms that we ask you to fill out at: http://www.bookingcenter.com/support/#Anchor-Support-docs. Once these docs are completed, just fax them to us (number below) and give us 10 business days to complete the customization. It's the easiest way to get going and is included with all BookingCenter packages.
