

GDS Profile - Property

The Property section highlights four key marketing concepts that can assist the positioning of your property on the GDS.

The screenshot shows a software interface for setting up property descriptions. At the top, there is a red header with the word "Setup" and a help icon. Below the header, there are three buttons: "Save", "Delete", and "Descriptions". The main content area has a breadcrumb trail "Setup > Property > Property Info" and a title "Descriptions" with a subtitle "Free form text about area, amenities, policies, etc.". On the left, there is a tree view menu with categories: "Area Information" (expanded), "Area Attractions", "Corporate Locations", "Location", "Dining & Entertainment", "Meetings & Events", "Miscellaneous Info", "Personnel", "Policies", "Property", "Services & Amenities", and "Travel Details". On the right, there is a text input field titled "Default Description Text:" containing the text: "Monteverdi is located in Castiglioncello del Trinoro almost equidistant between Rome and Florence."

The four key sections include:

- Descriptions
- Local Policies
- Property Summary
- Transportation Setup
