

Room Type Amenities

Room Type Amenities are a preset list of features that can be chosen for a specific Room Type.

The Room Type Amenities selected for the Room Type will appear on your website and GDS listings.

Room Type Amenities are added to each Room Type for customized amenities. If you have multiple Room Types, please set Amenities for each Room Type. We recommend to add as many as possible to help consumers and agents find properties to book.

Room Type can only be added and deleted, not edited. If you haven't added any Room Type yet, the Default screen will display with a blank list.
