

Print All Registration Cards For My Arrivals

The **Print Reg Cards** function creates a printable document with ALL of the Registration Cards for Guests Arriving on a particular Date. The "Order by" function gives you the ability to sort the Registration Cards by Last Name or Room.

The Registration Card itself is created and edited in [Letters](#) and must be set as the Default Letter in order to attach to the Print Reg Cards link in Daily Reports.

To Print ALL Registration Cards for a selected date:

Go to **REPORTS** Tab and choose the Print Reg Cards under the Daily Reports list .

- Go to **REPORTS**. Under **DAILY REPORTS** and click on the **Print Reg Cards** Report.
- **Date:** Choose the Date of the Arrivals for which you would like to print the registration cards.
- **Order by:** Choose how you would like the registration cards sorted, by Last Name or Room.
- Click **Generate Report**.

A new window will open with all of the Registration Cards listed.

Click Print Page and all Registrations cards for the selected date will Print.

NOTE: We have seen situations where the formatting of the Letter, when saved to a .PDF as occurs from this 'Print All Registration Cards' feature, overlaps to a second page, resulting in 2 pages for each Registration Letter. If this is happening to you, simply go into the Letters area (**Setup | Parameters | Letters**) and edit the Letter to reduce the text's font or amount of text to 'shrink' it to fit one page and try again. After a few back and forth's, it will come out as desired. See [Customize Letters](#)

To use this feature, you will first need to designate which Letter you will use as your Registration Card.

- Create or edit the Letter you would like to use as your registration card. See [Letters: Add Letters in MyPMS](#)
- Then go to **Setup | Parameters | Letters** and choose the letter you for the Registration Card by selecting it in the drop-down menu, next to Default Letter, at the top right of the List.

The screenshot shows the 'Letters' tab in the MyPMS interface. The 'Default Letter' dropdown menu is open, showing a list of letters. The 'Registration Card' option is highlighted. Below the menu, a table lists various letters with their IDs and descriptions.
