

Booking Information - Booking

Most of the Booking Information fields are optional and can be filled out as completely as needed.

The three required fields are used for tracking guest booking behavior and payment methods. They can be edited here at any time.

- [Source](#)
- [Guest Types](#)
- [Guaranteed By](#)

The [Source](#) and [Guest Types](#) fields are useful for keeping track of booking information used in guest marketing and tracking as well as in Reports. Plan out the information you will use and enter it in the SETUP Area in [Parameters Tab](#). The more detailed this information is, the easier the data will be to track and report.

To see how you can search Booking Information and create reports see [Search Bookings](#).
