

Adding Book Now! Buttons

The 'Book Now!' buttons can be added to your web site so customers can make online bookings. BookingCenter provides "Make a Booking Now" buttons or you can create your own "Book Now" buttons to match the "style" of your web site.

We recommend that you place a 'Book Now' button on all the web pages where you want a visitor to be able to make an online booking.

Once these buttons are set up on your web site, your system will be able to respond to an online inquiry and accept online bookings.

? Place the image you want to use as the "Book Now!" image on your web page.

? On all the pages you want a visitor to be able to click "Book Now," place the following code to bring up the correct enquiry into the booking system for your specific property. The code is always : <http://requests.bookingcenter.com/enquiry.phtml?site=SiteID> with the last digits your Site ID. So, if your BookingCenter Site ID is MADRID, your boeing URL that links room your "Book Now" button to your BookingCenter reservation service is: [http:// requests.bookingcenter.com/enquiry.phtml?site=MADRID](http://requests.bookingcenter.com/enquiry.phtml?site=MADRID)

? Go to www.BookingCenter.com/help/web_buttons.html to view 'Book Now' buttons as well as to read more detailed instructions for using web buttons on your web site. The BookingCenter.com Support Department is happy to help you get your web booking links working. Call us or email us at support@BookingCenter.com. Additionally, we keep a current Online Checklist that you can download from www.BookingCenter.com/support/ to provide detailed help with going online.
