

Digital Signature, Initial, Image, and Document Letter Storage

BookingCenter **eSign-Digital Signing** you create a customized Letter with a digital signature function and send it to a guest to open and digitally sign via a secure link attached to their booking. This allows you to request and store a digital signature for the guest at any time on or before the check-in date.

Once the letter is signed it is saved as a PDF and attached to the booking. The letter is date time and IP address stamped, so you have a record of when and where the letter was signed

There are two places in MyPMS where you can view the signed and submitted Default Signature Letters signed and submitted by the Guest.

1. **Booking Letters Tab:** The Digital Signing Log will display in the Letters Tab of the booking.
2. **Booking Log:** A log entry is added to the Log with the date, time and system date it was received.

Digital Signature Letter Storage- Letters Tab

After the letter is signed by the Guest and submitted, the Digital Signing Log will display in the Letters Tab of the booking. A log entry is added for each Default Signature Letter signed and submitted with the description, IP Address, Date and Time This gives record of when and where the letter was signed.
