

Manual Authorization

To add an authorize a dollar amount or increase the amount of a current Authorization on a guest credit card midway through a stay.

Some credit cards (usually American Express, Discover, and Diners Club) do not allow incremental authorizations. If this occurs, you will not see any errors, but when you look at the Amount Authorized, it will be the original value. This is not a bug in the system, it is just how some issuing banks still work. If you need to adjust the authorization for one of these card types, you will need to call your merchant bank and get a verbal authorization, as BookingCenter cannot do this.

To Add an Authorization to an existing credit card.

- Open the [Booking Details](#) and go to the Folio Tab.
- Below the folio in the Add Payment box, you will see a link to "Manage Credit Cards".
- Click "Manage Credit Cards" open the Credit Card details and Transactions list.
- You will see a list of the credit cards entered and transactions associated with that card. If you have a credit card already entered to guarantee the reservation, then the same credit card information is shown in the 'Guaranteed by' in the [Booking Information](#) of the Reservation. (Note: this card will be authorized at check-in if you have the [Authorization at Check-in](#) set to 'Yes')

Card	Type	Auth Date	Auth Code	Auth Amount	Status	Transaction Amount	
7088	MASTERCARD	25-APR-2018	701829P	\$1.29	STRIKED (S)	\$0.01	Delete Card
54681023887089	MASTERCARD	25-APR-2018	33084P	\$0.19	auth	\$0.00	View Details Delete Card
7876	VISA	26-MAY-2018	342854	\$1.29	decline	\$0.00	Delete Card

[New Manual Transaction/Card](#) [Swipe/Dip](#) [Close Window](#)

- Locate the credit card in the list and click "Modify Auth".
- Go to the bottom of the window and enter the new authorization amount.
- Click "Authorize"
- This will authorize the credit card for the newer, higher amount.
- If there is a problem, you will be redirected to the "Auth Failure Page".

To add a new credit card

Click "New Manual Transaction/Card" if using **Traditional MyCard®** or "Swipe/Dip " if using **MyCard EMV®**. You can either select the existing credit card on file or add a new credit card to authorize against. If you would like to process the less expensive swiped rate, then, when the cc# entry field has focus, the cursor is flashing in the text entry field, swipe the customers card. This will collect the swipec information.
