

MyPMS Release November 2, 2016

MAJOR ENHANCEMENTS!

Rate Grid - Change Rates, Sort by Agent: We have made major enhancements to the Rate Grid! The Rate Grid is now dynamic, giving you the ability to change a rate just by clicking on the rate for a specific day. See [Rate Grid - Daily Rate Change](#) We have also added a new sort feature by "Agent" making it easier to view rates allocated to each channel. See [Rate Grid](#)

Booking.com RateIntelligence and RateManager: We are excited to announce that the Booking.com/BookingSuite RateIntelligence and RateManager Tools are now integrated into MyPMS. All Booking.com Direct customers can now activate and use these Rate tools directly in MyPMS. Learn more! [Booking.com | RateManager and RateIntelligence](#)

NEW FEATURES

- **Booking and Guest Comments:** We have increased the size of these fields in the Booking Details for easier entry and readability. See [Booking Data](#)
- **'Print Registration' button for Arrivals.** On bookings with today's arrival date (in arrivals list), a 'Print Registration' button will now display next to 'Save and Check-in' at the bottom of each booking. See [Booking Action Buttons](#)
- **Rate Grid:** The "Default Rate" column has been replaced by the Rate Type, making it easier to see whether a Rate is a Parent or Child Rate. See [Rate Grid](#)

IMPORTANT UPDATE

Credit Card Retention Policy: In order to increase security for credit card data, we have implemented a Credit Card Retention Policy for Credit Card Numbers stored in Bookings. What this means is that Credit Card numbers will be retained for a period of 30, 60 or 90 Days after guest check-out and then automatically purged from the system after the designated retention period. The retention period (30 -90 days) depends on the setting you choose in MyPMS. For instructions, see [General Settings](#)

Note: The last four digits of the Card # used for payment in the booking will be retained.

We are pleased to announce that the following software bugs were fixed in this release:

- Booking Comments lists comment 3 times on bookings with next day's date.
- In House Guest Ledger did not display Departures.
- Booking comments Report: When choosing "all" , the results created duplicates and bookings with no comments
- Multi- rate entry was not recording correctly in Booking Log.
- Cancel a Booking button not working
- Auto Letters
- When editing Yielded Rates, rates reverting to default.
