

MyPMS Release November 29, 2016

NEW FEATURES

Reports- One year date range limit: In order to maintain data integrity, we have implemented a one year date range limit on the following reports. What this means is that these reports can be run for one year at a time, starting on any date you choose (past or future), but will be limited to one year.

- Occupancy Report
 - Occupancy Forecast Report
 - Revenue Report
 - Tax Exempt Report
 - Tax Transactions Report
 - Bookings Report
 - Booking Production Report
 - Batch Settlement Report
 - Booking Comments Report
 - Item Analysis Report
-

IMPORTANT UPDATE

Credit Card Retention Policy: In order to increase security for credit card data, we have implemented a Credit Card Retention Policy for Credit Card Numbers stored in Bookings. What this means is that Credit Card numbers will be retained for a period of 30, 60 or 90 Days after guest check-out and then automatically purged from the system after the designated retention period. The retention period (30 -90 days) depends on the setting you choose in MyPMS. For instructions, see [General Settings](#)

Note: The last four digits of the Card Card # used for payment in the booking will be retained.

We are pleased to announce that the following software bugs were fixed in this release:

- Room change from Booking Data doesn't post entry in Log Tab of the booking.
- Live Guest Lookup on Edit Screen of booking
- Clone Booking from TC sets booking a past date
- Use the room type sort order on inquiry for results
- Logging sent letters not working with Group Bookings
